Office Action Summary	Application No. 10/530,385	Applicant(s) RACKEL ET AL.	
	Examiner Lowell A. Larson	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE THREE MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Reference to the claims for disclosure on page 3, line 12, is improper.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Petros.

Support plate 42 and transport device 58 are withdrawn under floor level into the trench by the cylinder that removes the backup rolls. Compare Figures 1 and 5.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3 to 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

No clear antecedent basis is found for “the undercarriage” in Clams 3 and 4.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2, 3 to 6 as understood, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fereday et al. in view of Petros.

Fereday et al. discloses floor plate 24 supported by ramps 24, 35 for being removable to beneath the floor level by operation of the backup roll withdrawing cylinder 26. It would have been obvious to one having ordinary skill in the art to provide the floor plate 24 with a support plate, such as plate 42 of Petros, in order to facilitate replacement of the working rolls. Petros discloses the support plates 42 as displaceable transversely of the roll axis. The specific mechanism for effecting such displacement, as recited in Claim 7, is considered to be an obvious exercise of mechanical design in selecting among equivalent mechanisms which would occur to one skilled in the art for performing the same function, and not a patentable distinction absent a disclosure of criticality in the solution of stated problems with the use of any particular shifting mechanism.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sekiya further shows the state of the art.
